EDUCATION

2017 - 2021

Faculty of Technical Sciences

Information Systems Engineering

2013 - 2017

Secondary School of Economics

Financial Administrator

TECHNOLOGIES

Angular 20

Spring Boot 3.x

Node.js

MySQL/OracleDB

MongoDB

Typescript/Javascript

Nx

WORK EXPERIENCE

2022 - Present at IWConnect

Full-stack developer

Energy Information System - Designed the frontend architecture in Angular, integrated with Spring Boot. Implemented core UI modules, security (HTTP-only cookies), and configured Nginx and Jenkins for CI/CD.

Tech: Angular, Nx, Spring Boot, Jenkins, Nginx, Git

Documentation Generator - Developed a Node.js automation tool that automatically generates and updates Confluence documentation from SnapLogic data.

Tech: Angular, Node.js, Selenium, Azure, REST APIs, Git

2021 - 2022 at Devoteam

Full-stack developer

Healthcare Information System - Maintained and extended Angular and Node.js microservices. Implemented new features and resolved critical issues to improve reliability.

Tech: Angular, Node.js, Jenkins, Git, GCP

Notification Gateway - Developed a notification system using Angular and Spring Boot, enabling rule-based message delivery via SMS and Email templates.

Tech: Angular, Spring Boot, REST APIs, Git, SMS & Email protocols

2019 - 2021

Full-stack developer - Freelancer

Construction Information System - Developed a construction tracking system from scratch using Angular and Node.js, including CRUD operations, reporting, and data visualization features.

Tech: Angular, Node.js, Express.js, MongoDB, Git
